

Performance Vapour Pressure and Gas Filled Temperature Switches **700 Series**

721/2/3, 731/2/3/4,
771/2/3/4 & 781
Issue G

- Precision stainless steel mechanism for arduous atmospheres and high humidity.
- Set point adjustable over whole range against calibrated scale with tamperproof adjuster.
- Weatherproof and Flameproof models.
- Models for fixed switching differential, adjustable differential and HI-LO operation.
- Hermetically sealed microswitch option.
- ATEX and IECEx

Performance **characteristics**

Enclosure

- IP66 Protection

System options

- Stainless Steel capillary system and Brass Bellows (standard)
- Stainless Steel capillary system and Bellows
- Rigid stem.

Standard Electrical ratings

- Refer to table 6

Process connection

- 3/8 NPT External Sliding Gland, 1/2 NPT External Direct mounting.

Unit weight

- Between 2.2kg – 8.7kg (4.8lb – 19.1lb)

Accuracy

- Set point repeatability $\pm 0.5\%$ of span at 20 °C / 68 °F ambient.
- Scale accuracy $\pm 2\%$ of full scale.

Product **applications**

The 721 is suitable for a wide range of applications in many Industry sectors:

- Oil & Gas
- Chemical
- Petrochemical
- Refining
- Power
- Food Industry

The choice of models available ensures that the 721 is suitable for use in:

- Corrosive atmospheres
- Resistant to chemical attack

How can we **help you?**

Delta Controls' range of reliable pressure and temperature measurement instruments can be customised to meet individual requirements. For technical advice or to discuss your application please contact us on +44 (0) 20 8939 3500

Enclosure

FINISH

All enclosures except Type A are finished in light grey epoxy resin paint. Special finishes to order.

INTRINSIC SAFETY

Because of the low voltages and currents of I.S. circuits, we recommend using gold and/or sealed contacts.

NOTE: Enclosure K is not recommended on models 731/2/3/4, because of weight limitation on stem mounting.

Enclosure code A is recommended for use with System Codes E, F, G, H, T. (See Table 4.)

TABLE 1

WEATHERPROOF ENCLOSURES	Code
General Purpose The basic enclosure is pressure die-cast in zinc alloy, offering weather protection not less than NEMA 4 + 13/IP66.	W
For Aggressive Atmospheres Investment cast enclosure in austenitic stainless steel with weather protection not less than NEMA 4X + 13/IP66.	A
FLAMEPROOF ENCLOSURES CATEGORY 2 (ZONE 1)	
EExd IIC T6 (-60 to + 40°C), T4 (-60 to +80°C) II 2 G D Gravity die-cast enclosure in aluminium-silicon alloy, certified to CENELEC EN50 014 and EN50 018.  Suitable for outdoor use, IP66 / NEMA 4	H
IECEX ExdIIC certified to IEC 60079-0 and certified by IEC60079-1	
EExd IIC T6 (-60 to + 40°C), T4 (-60 to +80°C) II 2 G D As Code H, but sand cast in high quality grey iron.	K
IECEX ExdIIC certified to IEC 60079-0 and IEC 60079-1	
EExn ENCLOSURES CATEGORY 3 (ZONE 2)	
Type of Protection EExn II T6 (-20 to +40°C) II 3 G As code 'W' but EExn to EN50021. Weatherproof to NEMA 4/IP66.  Limited switching facility (see table 6)	N
As 'N' but with investment cast enclosure in austenitic stainless steel as 'A'.	O

Models

For model and range availability see Tables 5A and 5B.

Gas filled models offer range -50 to +150°C (-60 to +360°F) span 200 deg. C (420 deg. F) and a maximum working temperature of 250°C (480°F).

Models 771-4 is only available with armoured capillary systems.

Models 731-4 are not available with ranges above 120°C (250°F). Limitation due to heat conduction, causing an unacceptable rise in temperature at the head.

TABLE 2

Model – and System Type	Gas Filled Flexible Thermal System	Vapour pressure rigid stem system	Vapour pressure flexible thermal system
Fixed Switching Differential. See Tables 10A and 10C. Basic model giving close, fixed switching differential using proprietary microswitch operated by high integrity stainless steel mechanism. Set point field adjustable over full range against calibrated scale. SPDT & DPDT options available.	721	731	771
Adjustable Switching Differential. (Limited Span). See Tables 10B & 10D. Achieved by special microswitch with built in adjuster, SPDT only. Not available with enclosure code N or O.	722	732	772
Adjustable Switching Differential (Wide Span). See Tables 10B & 10D. Falling set point adjustable against a calibrated scale. Rising reset point adjustable to increase switching differential by up to 50% of range.	723	733	773
HI-LO Switching (Adjustable Gap). See Tables 10A & 10C. Two individual set points and separate electrical circuits, with independent adjustment against scale. Each switch may be SPDT only.	781	734	774

Electrical Entry

Adaptors are available for other popular thread sizes.

Enclosures 'W' and 'N'

Standard option code 1 (22mm dia) is provided with a nylon 22/20 reducer and fibre washer suitable for a standard M20 cable gland and back nut. Option code 0 elbow adaptor is factory fitted. Adapter kits may also be provided retrospectively to fit at site if required. Ask for details. See diagram in DIMENSIONS

'W' and 'N' SAFETY NOTE

If a metal cable gland is site fitted it must either be earthed locally or an earth/gland plate must be used to connect the body of the gland at the enclosure earthing point. Earth/gland plates can be provided either factory fitted or in kit form for site assembly.

TABLE 3

	Code

Enclosures H & K: 3/4-NPT INT.	3
Enclosures H & K: 3/4-NPT INT. dual entry	6
Enclosure W: M20 x 1.5 elbow adaptor.	0
Enclosure N: M20 x 1.5 straight adaptor (Approved).	0

System Details

TABLE 4

Models 721-3, 771-4, 781

The flexible thermal system of Models 721-3, 771-4 & 781 comprises an armoured capillary attached to the sensing bulb via a semi-rigid extension on which a compression gland slides to enable various depths of thermowell (pocket) to be accommodated. See DIMENSIONS.

All parts of the thermal system are in 300 series stainless steel with the capillary sensing bulb and armour in 316 stainless steel.

The thermal systems of Models 731-4 comprises a rigid stem attached to the sensing bulb by an extension on which a compression gland slides to accommodate various attachments the gland has a 1/2-14NP external thread. The rigid stem version has probe materials of 316 stainless steel.

Capillary Length †		Length of Semi-rigid Stem †		Stainless Steel System & Brass Bellows	Stainless Steel System & Bellows

The electrical rating is dependent on the microswitch fitted to the instrument. The electrical ratings defined by each approval that the microswitch complies with and is shown on the product nameplate, ie UL/CSA, or IEC. It should be noted that the instrument must be used within the electrical rating specified from the approval you require. This table lists the actual IEC ratings against the Designation & Utilization Category marked on the nameplates. In the absence of any verification by UL/CSA the microswitch § manufacturer's rating is stated in <i>italics and bold</i> . If in doubt seek guidance from the factory.									
NOTE: For low energy circuits e.g. 30V and up to 100mA, we recommend using gold alloy contact switches.									
U _i = rated insulation voltage U _{imp} = rated impulse withstand voltage across contacts.									

Process Connection

Adaptors to other threads are available as optional extras.

Other thread specifications and sizes are available without using adaptors. See DIMENSIONS

THERMOWELLS

Material 316SS.
Maximum Working Pressure
140bar (2000psi) at 20°C

Thermowells can also be manufactured to customers own drawing/specification requirements.

Performance Data

Celsius Units (°C)

TABLE 10A

FIXED SWITCHING DIFFERENTIAL

Models 734, 774, 781 the switching differential on each point may be up to 1.5 times that of Table 10A & 10C. Care must be exercised, therefore, in specifying high differential switches or set point separation less than 3 times switching differential.

Technical Specifications

ACCURACY

Set point repeatability $\pm 0.5\%$ of full scale at 20°C ambient.
Scale accuracy $\pm 2\%$ of full scale.

NOTE: For models 721-3, 781 scale accuracy will be affected by relative position of head and sensing bulb i.e., sensing bulb 1 metre above/below head = set point shift minus/plus 1% of full scale approx.

AMBIENT TEMPERATURE RANGE

All models are suitable for operating within a range of ambient temperature from -25 to +60°C (-13 to +140°F).

Models 771-4. A 10 deg Celsius (18 deg F) rise in ambient temperature will on average result in a 1 deg (Celsius 1.8 deg F) fall in set point.

ELECTRICAL CONNECTIONS

Terminal Block

Cable entry is to a non-pinching block made of a non-hygroscopic thermosetting plastic, suitable for cables up to 2.5mm²/14AWG.

Earthing/Grounding

An earthing stud is provided inside all weatherproof enclosures, adjacent to the entry. External earthing is standard on flameproof versions.

'W' and 'N' Safety Note

If a metal cable gland is site fitted it must either be earthed locally or an earth/gland plate must be used to connect the body of the gland at the enclosure earthing point. Earth/gland plates can be provided either factory fitted or in kit form for site assembly. Ask for details. See diagrams in DIMENSIONS.

Dielectric Strength

The electrical assembly is capable of withstanding *2kV between live parts and earth/ground and 500V between open contacts.

*1.2kV for micro switch Codes H2, H3, H4 and H6. Refer to Table 6.

Electrical Entry

Standard options are listed in Table 3. Other threads can be accommodated by adaptors. Dual entry available on some enclosures.

MAXIMUM WORKING PRESSURE

System sensing probes for both the capillary and rigid stem version are designed to withstand 100bar (1500psi) without thermowell.

Mounting

Position/Location/Installation

Vertical as shown, in **dimensions**, taking care to avoid siting in locations that transmit excessive shock or vibration. For further advice contact our engineers.

Pollution degree (EN60947-5-1)

All products are suitable for use in pollution degree 3. For extreme conditions where condensation may readily form, then sealed contacts should be used. See Table 6 codes 08/09, 0G/0H, 2G/28, H2/H3/H4/H6.

Electrical Isolation – These products are not suitable for electrical isolation. Always isolate circuit separately to carry out any electrical work.

NOTE: On models 721-3, 781 it is advisable to avoid the condition where the ambient temperature is within ± 5 deg Celsius (± 9 deg F) of the set point. Under this condition the liquid/vapour phase becomes less well defined and the switching differential increases. Where this condition is unavoidable refer to Models 740/760 Liquid Expansion Temperature Switches or 771-4.
